Bachelor of Technical and Applied Studies

The Bachelor of Technical and Applied Studies (BTAS) is intended for students who have already completed an applied associate's degree program from an accredited community college, regional campus, or technical college, and who wish to pursue a baccalaureate degree.

The BTAS builds upon the technical skills developed within applied associate degree programs by providing the knowledge and professional skills necessary for career advancement. The program utilizes 96 quarter hours of associate degree credit, of which 36-45 quarter hours must be in a technical field. Another 96 quarter hours are needed to meet the minimum for a baccalaureate degree.

In addition to the 49-56 hours of major requirements listed on the back, the student may expect to spend 24-36 hours meeting general education requirements and prerequisites. The remaining 4-23 hours are electives. A course may not count for two requirements within the major.

Progress to the degree is assured by consultation at every stage of the program with an Ohio University academic advisor.

This is subject to change. Please see an Ohio University Academic Advisor!

TAS Curriculum

Students must complete a minimum of 48 credit hours at Ohio University, including 50% of the courses required for the major. Students may not take more than five BTAS core/major courses at Hocking. If more than two BTAS electives are transferred in, students must replace the courses with Ohio University electives. (Specific elective courses will not be delivered on a guaranteed schedule.)

BTAS Requirements: Students must complete all three TAS courses and PSY 221.

Between Hocking and Ohio courses, students must complete

- Five **Professional Skills** courses (P) with at least one course in each level (P1, P2, P3),
- Two **Behavioral Skills** courses (B) with at least one course in each level (B1, B2), and
- Two **Leadership and Organization** courses (L).

The curriculum combines oral and written communication skills with the study of applied leadership theory and practice. Three core courses, designed specifically for the program, are sequenced to help students make the transition from technical to professional skills.
